

CAJ PROFILE COMMUNICATIONS AND INFORMATION NETWORK ASSOCIATION OF JAPAN

2024-2025

Connecting all industries and generations to co-create the future

We play an important role as a bridge to the prosperous new future by connecting one's various creative ideas based on information and communication technology.

The Communications and Information Network Association of Japan (CIAJ) promotes the further use and advancement of information and communication technologies (ICT), aiming for the robust growth of all industries that provides and/or utilize the ICT by bringing together diverse industries and sharing insights. Through such initiatives, CIAJ has the mission of contributing to solving social issues and realizing an enriching society in Japan as well as a sustainable global community.

CIAJ was established in 1948 as a voluntary industry association composed mainly of telecom terminal manufacturers and network infrastructure vendors. In October 2009, CIAJ embarked on a new page in its history by becoming a general incorporated association.

CIAJ's diverse regular members include communication network and equipment vendors, telecom carriers, service providers and user companies.

Acting as a voice for the ICT industry, CIAJ is committed to the healthy development of the industry. We strive to further strengthen our capabilities to

present policy proposals as well as advocate industry views on government policies, establish a suitable environment for the creation of new businesses by promoting the use of ICT, encourage global business initiatives and tackle common industry issues, such as easing the industry's impact on the environment.

ANRITSU CORPORATION IWATSU ELECTRIC CO., LTD. OKI ELTRIC INDUSTRY CO., LTD. HITACHI KOKUSAI ELECTRIC INC. MITSUBISHI ELECTRIC CORPORATION

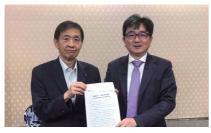

CIAJ contributes to the advancement of ICT as the industry association representing ICT.

Presenting policy requests and industry views on government policies for the vitalization of the ICT industry

CIAJ promotes the robust growth of the industry by making policy requests to the government, representing member "voices" for public comments and exchanging views with relevant authorities from the perspective of "strengthening alliances with other industries," "promoting global business initiatives" and "tackling industry-wide issues."

The Chairman submitted a CIAJ policy proposal to State Minister for Internal Affairs and Communications in June 2024.

Opinion-exchange meeting on wireless business between CIAJ and Japanese government in March 2024.

Creating new businesses

Promoting global business and the applications of ICT in new areas, on-going activities include multi-dimensional support of 5G and IoT business initiatives and co-sponsorship of annual international exhibition, CEATEC.

Tackling issues faced by the ICT industry

Taking the lead in addressing environmental issues, enhancing safety and reliability and other industry-wide challenges. Actual initiatives cover decreasing the industry's carbon footprint to ease global warming, promoting the recycling of mobile phones, raising awareness of network security and establishing communication accessibility for all.

Creating opportunities for human resources development

CIAJ has launched a "Workshop for a Network to Create the Future" to discuss Japan's future network across generations and to make policy requests to the government by young generation people, with an aim to connect to the development of the ICT industry. Furthermore, we organize the "KOSEN(Technical College) Wireless Tech Contest", a wireless technology contest for technical college students in Japan. The objective is to support the human resources development and solve regional issues through wireless technology demonstrations by students.

Cross-generational discussion in the "Workshop for a Network to Create the Future."

Excellence Award Team in the "KOSEN(Technical College) Wireless Tech Contest 2023."
