CIAJ PROFILE

COMMUNICATIONS AND INFORMATION
NETWORK ASSOCIATION OF JAPAN

Who we are

The Communications and Information Network Association of Japan promotes the further use and advancement of info-communication technologies (ICT), aiming for the robust growth of all industries that provides and/or uses info-communication networks by bringing together diverse industries and sharing insights. Through such initiatives, CIAJ has the mission of contributing to solving social issues and realizing an enriching society in Japan as well as a sustainable global community.

CIAJ was established in 1948 as a voluntary industry association composed mainly of telecom terminal manufacturers and network infrastructure vendors. In October 2009, CIAJ embarked on a new page in its history by becoming a general incorporated association.

CIAJ's diverse regular members include communication network and equipment vendors, telecommunication carriers, service providers and user companies.

Acting as a voice for the info-communication industry, CIAJ is committed to the healthy development of the industry. We strive to further strengthen our capacity to present policy proposals as well as advocate industry views on government policies, establish a suitable environment for the creation of new businesses by promoting the use of ICT, encourage global business initiatives and tackle common industry issues, such as easing the industry's impact on the environment.

CIAJ contributes to the advancement of ICT as the industry association representing info-communications.

Presenting policy requests and industry views on government policies for the vitalization of the ICT industry

CIAJ promotes the robust growth of the industry by making policy requests to the government, representing member “voices” for public comments and exchanging views with relevant authorities from the perspective of “strengthening alliances with other industries,” “promoting global business initiatives” and “tackling industry-wide issues.”

The Chairman submitted a CIAJ policy proposal to Parliamentary Vice-Minister of Internal Affairs and Communications in May 2023.

Opinion-exchange meeting on wireless business between CIAJ and Japanese government in Feb. 2023.

Creation of new businesses

Promoting global business and the applications of ICT in new areas.

On-going activities include multi-dimensional support of IoT business initiatives and co-sponsoring the annual international exhibition, CEATEC.

Tackling issues faced by the info-communication industry

Taking the lead in addressing environmental issues, enhancing safety and reliability and other industry-wide challenges. Actual initiatives cover decreasing the industry’s carbon footprint to ease global warming, promoting the recycling of mobile phones, raising awareness of network security and establishing communication accessibility for all.
